

Hydraulique Sans Frontières

Committed to support UN 2030 SDGs N°6 (Sustainable Development Goals) : Provide access to Clean Water and Sanitation in the less advanced countries.

PROBLEMATIC

■ According to a World Health Organization and UNICEF study, **2.1 billion** people, comprising 30% of the world's population, lack access to domestic water supply, while **4.4 billion** people, accounting for 60%, do not have access to safe sanitation infrastructure.

2,1 Billions people don't have access to clean water.

4,4 Billions don't have a safe sanitation infrastructure

■ Potable water, sanitation, and proper hygiene are essential to safeguard the health of every child and community. Every year, **361,000** children under five years old die from diarrhea, not accounting for the poor quality of sanitation infrastructure. Contaminated water fosters the transmission of diseases such as cholera, dysentery, hepatitis, and typhoid.

Hydraulique Sans Frontières : Committed to improve Access to water

Founded in 1990, Hydraulique Sans Frontières is a non-profit organization specialized in the field of water and sanitation infrastructure. Through the construction of water supply systems and toilets, HSF significantly contributes to improve living conditions for local populations in the following countries: Senegal, Benin, Burkina Faso, Togo, Cameroon, Côte d'Ivoire, and Madagascar.

**We believe that access to clean water is a
fundamental human right**

Values

Humanism, solidarity, and partnership are the values that guide Hydraulique Sans Frontières in his mission. It is a secular non-profit organization that operates by adhering to professional ethics, an international spirit of solidarity, dynamic global development, and local laws and cultures compatible with universal values.

Missions

HSF has two missions: In the South, to act on the Sustainable Development Goals through water and sanitation projects. In the North, to promote international solidarity.

Actions

Hydraulique Sans Frontières promotes the autonomy of local populations in emerging countries. It acts upon the solicitation of local villages, primarily in rural areas, and supports projects in the following fields:

- Access to drinkable water
- Technical training
- Public water management services
- Sanitation infrastructure
- Development education

Operations areas
